WELCOME

Welcome to Millennium Medical, a place where we emphasize “patient care” rather than “symptom care” – offering a more effective way of achieving long-term wellness than the temporary damage control so common in today’s traditional medicine. Our goal is to provide excellent care where patient and doctor work together in a caring, nurturing and supportive environment.

Your first day in the office is a fact-finding mission. Consultation, examination, blood work and X-rays may be performed to help us thoroughly understand your complete medical picture. Only by understanding the origins of a medical issue can we take the first step towards achieving good health. Depending on your individual case, you may be referred to one of the many specialists here at Millennium Medical for additional testing and/or consultation.

Your next visit will more than likely consist of a report of findings, at which time a complete explanation of your condition will be given. You will have an opportunity to have your questions answered, our goals will be defined, and your treatment schedule will be discussed. We encourage and promote patient involvement, and we strive to give you a choice of treatment options, including traditional and alternative care.

In closing, we are excited to be involved in your healthcare. It’s time to rediscover what feeling your best feels like. It’s time to make **you** a priority. Please feel free to contact our patient services department if you need anything.

Controlled Substances Agreement

Patient Name: _____ Date of Birth: _____

This agreement is to inform you about the controlled substances policies of the Medical Department of Millennium Medical. Pain control is a partnership effort between you and your doctor. This agreement is adapted from guidelines set forth by the Florida Board of Osteopathic Medicine on a review of Rule 64B15-14.005 of the State of Florida. Millennium Medical's controlled substances policy must be agreed to by you, the patient, in its entirety. The policy is as follows:

1. Controlled substances are to be prescribed by only one doctor and filled at only one pharmacy. If you receive a controlled substance from another physician, you must report it to our office within one (1) business day.
2. Prescriptions are only available at regularly scheduled office appointments. These medications will not be called into the pharmacy and prescriptions will not be written without an appointment.
3. Any lost, stolen or otherwise missing prescriptions will not be replaced – no matter what the circumstances. There are no early refills and no exceptions.
4. The patient agrees to urine and/or serum drug lab testing as requested by the doctor without advanced notice (the cost of which becomes the patient's responsibility). Furthermore, the patient agrees to abstain from any recreational or illegal drugs and alcohol while under treatment.
5. We generally **DO NOT** write prescriptions for the following medications or compounds containing them: **Morphine, Oxycodone, Percodan, Percoset, Fentanyl, Demerol and Dilaudid.**
6. You are entitled to know about your medicine including risks, benefits, side effects, and other pertinent information. Your doctor will be glad to discuss these with you. Please relay any concerns or questions to your doctor so that your comfort and safety are ensured.
7. We generally **DO NOT** write prescriptions for narcotics for chronic pain on your initial visit to Millennium Medical. If, after discussion with you, we agree that part of your care plan includes the need for narcotic pain medication, we will limit your initial prescription to one week's worth of medication. We also reserve the right to call your pharmacy or other healthcare facilities to confirm compliance with our policy
8. If your care plan includes other therapies, such as massage, chiropractic, physical therapy or acupuncture, we will expect you to comply with that plan.
9. We will be glad to refer you to a pain management specialist if these policies do not meet your pain management needs.

On a scale from 1 to 10, please rate your pain when it's at its worst (0 = no pain, 10 = worst pain): _____

What are your goals in regards to your pain treatment? (Check all that apply)

This cancellation will remain in effect until these violations have been remedied to the satisfaction of the attending physician.
